**MEDIA LITERACY AND DIGITAL SKILLS
TO DETECT AND PREVENT DISINFORMATION**

Discover DoCHECK!

The DoCHECK! project is an innovative initiative that aims to address the current challenges of disinformation and digital transformation in the educational field. DoCHECK! is an Erasmus+ project to strengthen digital skills, critical thinking, and media literacy of European students aged 14 to 18, as well as their families and educators. Through the creation of educational resources in five languages in accessible and engaging formats, we provide young people with the necessary tools to identify and combat online disinformation. Additionally, we focus on promoting common values, civic engagement, and active participation in society. To achieve this, we work closely with teachers and parents, providing them with the necessary support to integrate our educational resources into the classroom to enhance critical and reflective learning.

Educational materials and online resources designed for teachers and students

Foster critical thinking and media literacy approach with students in class

Assess and validate key competencies with resources in five languages
